**Note:** Users marked as “**Not Eligible (Not Registered)**” are new or not enrolled in the Sehat Card program. The agent should advise these users to **apply for a Sehat Card** through the government’s

designated hospitals or the official website. The dataset also supports Urdu text. For example, *Shireen Baloch* can be stored as شیرین بلوچ and her father's name *Rehmat Ullah* as رحمت اللہ in the database. Similarly, hospital names can be displayed in Urdu (e.g. شوکت خانم میموریل بسپتال for *Shaikat Khanum Memorial Hospital*). This ensures the agent can interact with users in both English and Urdu as needed.
